CALDAS'S YELLOW FEVER GERM

NO FURTHER EXPERIMENTS WITH IT IN HAVANA.

A Commission Appointed to Investigate the Effeacy of the Serum Reports That It Has Falled to Immunize adividuals Against Yellow Fever.

Special Cable Despatch to THE SUN. HAVANA, Sept. 6 .- A special yellow fever mission, appointed to investigate the Caldas's serum has submitted a report. The commission consisted of the Yellow Fever Board and Surgeon Major Havard. The report says that Dr. Caldas refused to show the yellow fever germ, which he claimed to have isolated.

The reason for his refusal was that he had given pledges to the company that had been formed to exploit his discovery. Dr. Caldas asked the commission to test his serum by having a man previously inoculated with it bitten by a mosquito which had previously bitten a yellow fever pa-Nevertheless, he subsequently gave as one of his reasons for not believing that the man Alonso, who had been inoculated with his serum, had yellow fever was that mosquitoes prepared by the board, namely by biting yellow fever patients, could not give yellow fever, but only putrid

The report also says that the commission came to the conclusion that Dr. Caldas had made up his mind that the case should not be one of yellow fever so far as he was concerned and he would not study it with a scientific spirit. This refers to the time when Alonso's disease was diagnosed as vellow fever and the case was shown Dr. Caldas and he was asked to examine it for The conclusions of the board

First, that Dr. Caldas kept his alleged discovery from the study of other scientists; second, that the claim made by Dr. Caldas that the yellow Tever agent was found only in the intestinal tract was in direct opposition to the evidence furnished by mosquito inoculations and direct blood inoculations made by the board presided over by Major Reed, U. S. A.; and third, that the attempt made by Dr. Caldas to immunize individuals against yellow fever by means of the serum prepared by him

The commission therefore recommends that all further experiments with the serum cease. The report is signed by Surgeon Major Havard, Dr. Gorgas, the chief medical officer and Drs. Guiteras, Finlay and Albertini. Dr. Havard has written an account of the experiments for the Medical

ARONSON WON'T GIVE IN.

He Says Kubellk, the Planist, Will Never Play Here Under Frohman Contract.

Rudolph Aronson arrived in New York yesterday and told a SUN reporter his grounds for the \$50,000 damage suit aganist Daniel Frohman growing out of the engagement of Jan Kubelik for a tour in this country. Mr. Frohman has Kubelik under contract for sixty appearances, to begin at Carnegie Hall on Dec. 1. Mr. Aronson

Believe me, Kubelik will not be heard in this country under the contract that he has made with Mr. Frohman. There are several reasons for that. In the first place, he is a minor and the contract is signed by him which under the laws of Austria is illegal. He is now only 21 and under the Austrian law will not be of age for four years more. I have heard that Hugo Goerlitz went to Prague and had the boy declared of age, but such a trick as that will never hold. In the second place, the contract between Kubelik and Norbette Dunkl has still about two seasons to run. He has not to this day the slightest idea that Kubelik has signed a contract with Daniel Frohman

for America.

"I saw Mr. Frohman in London and told him of Kubelik, whom I heard first in Vienna two years ago when he was almost unknown. I asked him if he would not like to bring him to America. He heard him and said that he would. At that time Dunkl was thinking of taking Kubelik to Russia and it was not decided whether are rot be would come here. Mr. Frohman or not he would come here. Mr. Frohman deposited \$10,000 with Dunkl and suddenly telegraphed from Lodnon to return his deposit as he had made other arrangements. The money was, of course, sent back as it was not needed; but neither Dunkl nor I had any idea that Mr. Frohman intended to break the contract he had made with us. If we had we would never have been fools enough to send the \$10,000 back

Our contract with Mr. Frohman is to bring Kubelik to this country and it not be broken merely by persuading the boy to sign a contract. The contract between me, Dunkl and Mr. Frohman was all settled and it will be kept or the boy will never play here. Dunkl is a man of wealth and will spend his last cent in making Kubelik keep his contract with

MONON NOT SEEKING E. & T. H. But Persistent Buying Leads to the Bellef

That a Deal Is On. An advance in the price of Evansville and Terre Haute railroad shares was caused in the Stock Exchange yesterday by the report that J. Pierpont Morgan was buying report that J. Pierpont Morgan was buying the control of that road to turn it over to the Chicago, Indianapolis and Louisville Railroad (the Monon) in which he has a dominating interest. This statement was denied authoritatively, but persistent buy-ing of Evansville and Terre Haute shares led to the belief that there was a deal of some kind under way.

FINANCIAL AND COMMERCIAL

FRIDAY Sept & The stock market to-day was harrow and professional and for the most part uninteresting. Trading showed a decided falling off from Thursday's moderate total and the fluctuations recorded reflected chiefly the covering of short contracts London for the first time in some days took very little interest in this market dealings for account of that centre being checked owing to the holiday on the London Stock Exchange to-morrow and the server ment on Monday. Local operations was restricted by uncertainty regarding the immediate course of the money mark at

The usual weekly compilation of the known movements of money indicates a loss in cash by the local banks of approx. imately \$4,300,000. The aggregate side ments to the interior showed an excess the the receipts of only \$406,134 and the aggregate outgo, both direct and through the Sub-Treasury, was \$5,214,000, as against receipts of \$3,403,306. Last week the ag gregate shipments were \$6,476,950 The oss of the banks this week to the Sub-Treasury on its own account was \$2,534,000 There was but little change in the local money market.

Opening quotations showed slight irregular changes in prices as compared with yesterday's closing figures. During the greater part of the day irregularity continued to characterize the movement but in the afternoon the market was manipulated upward by brokers supposed to be acting for a leading professional, the advances being attributed to the exceptionally favorable character of the railroad reports submitted, and, more directly, to the expectation of imports of gold Reports of an engagement of \$500,000 in gold in the London open market, presumably for shipment to this country, were reiterated

The sterling exchange market displayed further weakness, the lowest figures of the season being reached. The supply of grain bills is falling off, but bankers tinue to draw bills against recent pur chases of stocks by London and the adof the cotton crop movement period is a weakening influence. The demand from remitters to-day was reported below that usual on a Friday. In addition to the dreumstances noted the firmer tendency of the local money market naturally exerted some influence

The only railroad stocks that attained comparative distinction in respect to activity were Erie common, Union Pacific common, Brooklyn Rapid Transit, Atches common and Mexican National Was the exception of Brooklyn Rapid Transit, which at a rally of 11; from the lowest price left off a shade higher on the day, the stocks mentioned showed fractional net improvements extending to nearly a point.

On lighter trading advances were made in other issues, extending to a point of thereabouts, in Metropolitan Street Railway. Canadian Pacific, Canada Southern, Louis ville and Nashville, Missouri Pacific. cago and Eastern Illinois, and Peoria and Eastern. Evansville and Terre Hauts showed a further net advance of 212 and Great Northern preferred rose 11, per cer The United States Steel shares were neglected, but sustained only triffing net losses notwithstanding the intractable attitude of the leaders of the Amalgamated Associaion. Confidence is generally entertained of a rapid desintegration of the strike Amalgamated Copper, at a recovery nearly a point, closed fractionally lower than on Thursday, while American Smelting, which was also fairly active, left of 11, per cent lower. On nominal trading olorado Fuel and Iron lost nearly 3 point-The stock market closed irregular, but

mainly firm. The Stock Exchange had been closed two hours before word was received in Wa Street of the murderous attack on Predent McKinley. There was no discordant note in the expression of horror and regret other business but it was the general opinion in the most influential banking circles that the radical difference in the condition of the count since the last attack was made upon an American President affords protection
